

Dear St George's Fields Resident,

## St George's Fields – Hyperoptic Super Fast Broadband

As you are aware the board of St George's Fields have approved installation of our fibre broadband service. St George's Fields currently utilises old copper wiring for its broadband accessibility and other providers have no plans to upgrade their offering.

As a resident/owner in St George's Fields, you will receive a free fibre broadband socket installation. This socket does not commit you to the service, but ensures you are available to take the service at any time in the future and also saves you £240 of installation costs. **Any resident wishing to take up this offer, must register their interest via the Hyperoptic website on [www.hyperoptic.com](http://www.hyperoptic.com).**

Please note that Hyperoptic's proposed service does not require exclusivity with in the development and can sit alongside any other broadband or TV provider.

Hyperoptic was voted "Best Superfast Broadband Provider 2013, 2014 & 2015" by the Internet Service Providers' Association. Hyperoptic enables internet users to surf the web at speeds that are 56 times faster than the UK average speed of 14.7Mbps and nearly 10 times faster than any other provider.

Even if you are not interested in our service straight away, I would encourage you to register as this will qualify you for our free installation service that may not be available in the future.

I am the relevant Hyperoptic representative for St George's Fields, so please don't hesitate to get in touch with me on my contact details below if you have any queries or concerns.

Yours Sincerely,

**Jeremy Domantay**
