

Candidate Information Request

Completion of this part of the nomination form is not mandatory. By supplying the information on this form you agree that it may be circulated to shareholders in St Georges Field Limited together with the details of the nomination above in accordance with the Articles of the Company.

- 1. Please supply a CV in not more than 150 words with particular regard to relevant experience or other relevant information specific to the nomination.**

SGF has been my home for almost 8 years and I live here full time. My professional background is that I trained as a specialist dentist (orthodontist) and have worked and collaborated with people of all ages and backgrounds in the public and private sectors. The experience I gained serving on 2 committees during my postgraduate training and more recently on the Members Committee of a London sports and social club has given me the opportunity to appreciate multiple perspectives. Earlier this year I commenced a full time Graduate Diploma in Art and Design at the Royal College of Art and I feel my design experience would be helpful to the Rejuvenation Project.

SGF is fortunate to have a good day to day management team and I feel that as a non-executive director I could add value to the policy making and future planning for SGF. I am enthusiastic about the Rejuvenation Project but equally mindful of all the practicalities and costs involved ensuring that any improvements are the benefit of all residents of all generations.

- 2. Please indicate in not more than 100 words what specific policies you might advocate as regards the direction of St George's Fields Limited if you were elected to the Board.**

Policies I would like to advocate for if I were elected for the board include the following:

Firstly, the Rejuvenation Project is a much wanted and needed project and I would do my best to ensure that as many people as possible are satisfied with the outcomes.

Secondly, I would like to investigate more green initiatives for SGF. We have a wonderful micro-environment; however, water is becoming an increasingly precious resources and I would advocate for water harvesting along with making our food waste management easier. These ideas have been examined in the past but over time options improve and require re-visiting.
